3 A levels: Maths, Design Technology, Physics
AS level: Electronics

Work experience

July 2010 – Current **Archive Logistics, Norfolk**

As a temporary measure assisting an ISO registered family company in all aspects of work; learning procedures and systems. My duties have been varied from delivering/collecting boxes to/from Clients in the early stages to now liaising with a research company and having direct input to a critical software system changeover from Access to Sequel. This is dominating my work load at present but I am also responsible for the redesign of the company website with a deadline of mid-November.

July 2008-July 2009 **Tyco Electronics Raychem GmbH, Munich, Germany**

Located in the Quality laboratory in the Research and Development division I was involved with testing heat shrink polymer tubing and part of a vital busy team. Working full time it proved to be an intensive but enjoyable year. For more detail refer to my website.

Skills

A good team player. Client and solution focused with strong interpersonal skills: practical and committed. I have a good eye for detail and respond positively to challenges. Whilst my German is not fluent I have a good conversational understanding and am improving my response skills.

Computer literacy: Microsoft: Word, Excel, Access, PowerPoint and Visio. CAD packages: AutoCAD (City & Guilds); UGS NX 4.0; Solid Edge. Dreamweaver.

Interests

Golf: working to improve my current handicap (16).

Social: A 'people' person, friendly, outgoing, sense of humour. Enjoy cinema and seeing friends.

Travel: After my studies took a mini-gap year: Thailand, Singapore, Malaysia, Australia, New Zealand, Fiji.

Gym: regularly train to keep fit.

Automotive: enjoy driving, and have own transport.
